## Easy Icicles

### Step 1

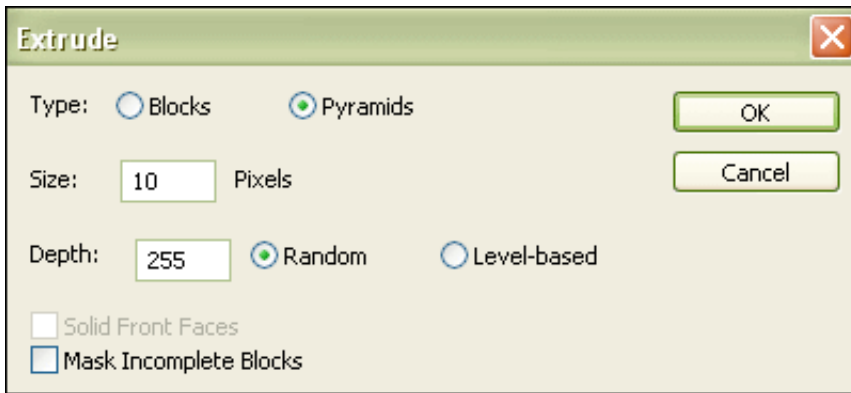

Create a new document, make the background black and use the elliptical marquee tool to draw a circle and fill it with white.

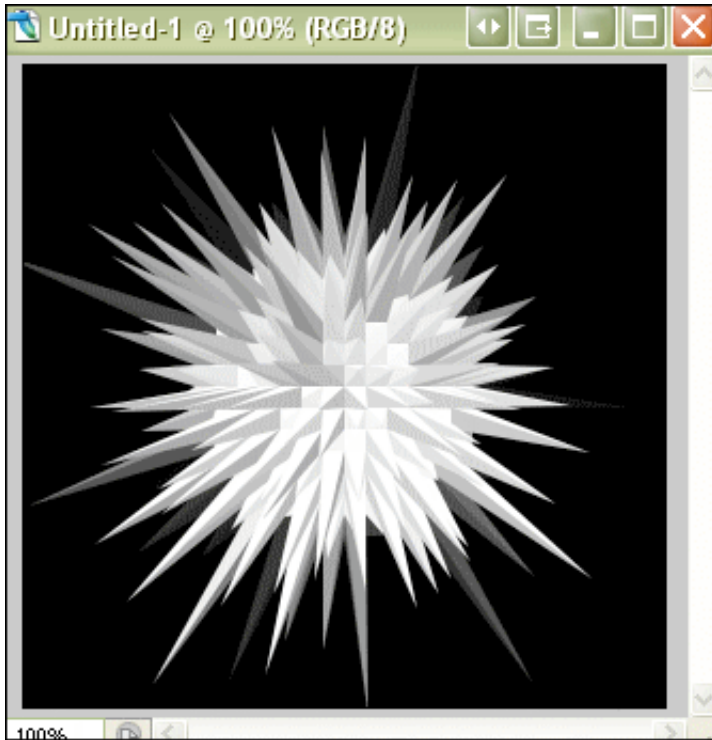

### Step 2

Use Filter --> Stylize --> Extrude

You might want to play with the values to create different shapes of icicles

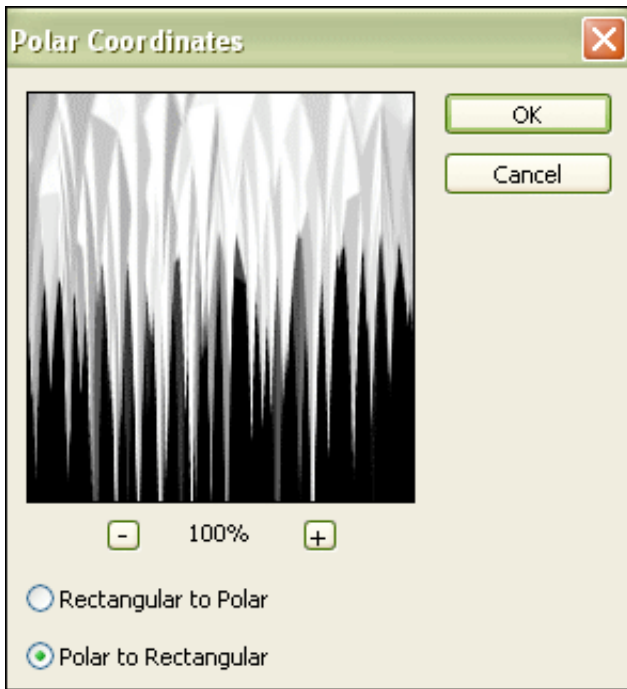

It should look something like that then:

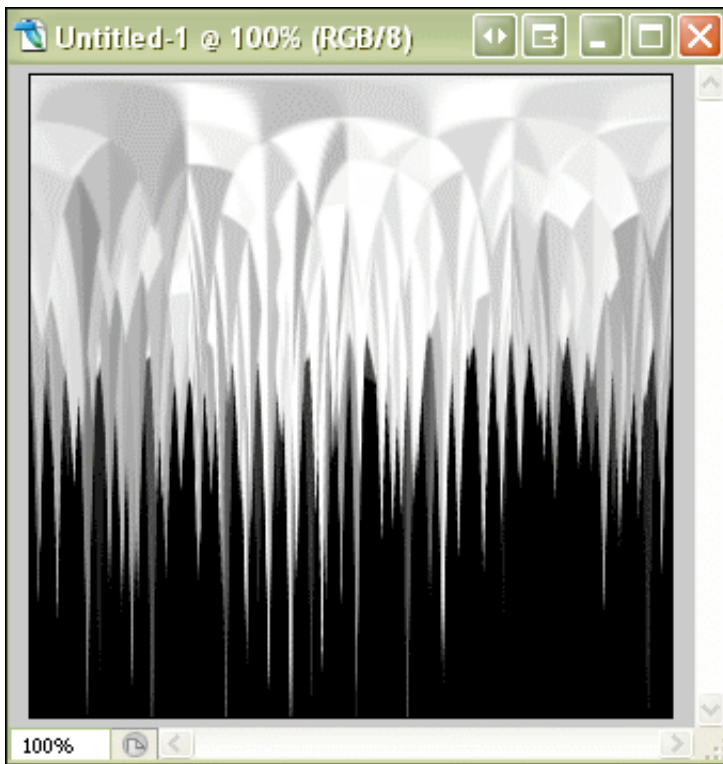

### Step 3

Now goto Filter --> Distort --> Polar Coordinates..

Choose Polar to Rectangular

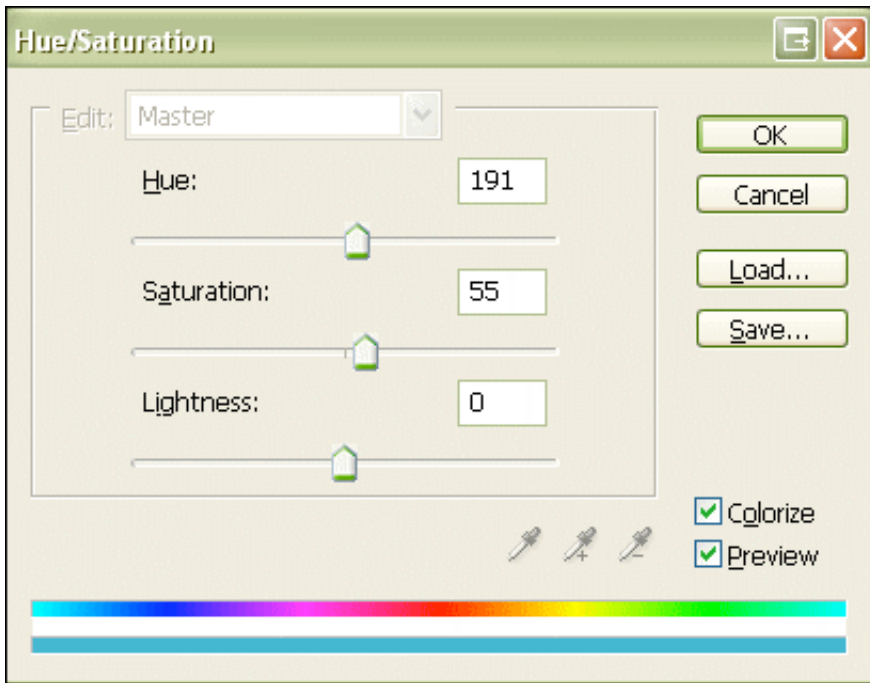

You should come up with something like this:

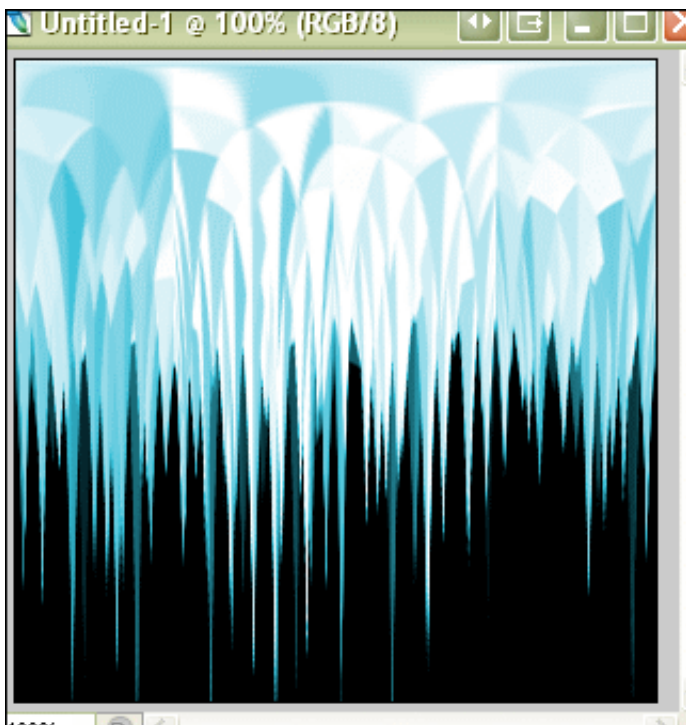

## Step 4

Hit CTRL-U and pick a nice blue for your icicles

That's it!
