

Fred Showker Presents The Holiday Tree

Greetings, and Happy Holiday.

Print this on your laser printer as a pattern
Transfer to heavy card stock (110 lb. index,
etc.) by punching tiny holes through the
pattern into the card stock using a straight pin.

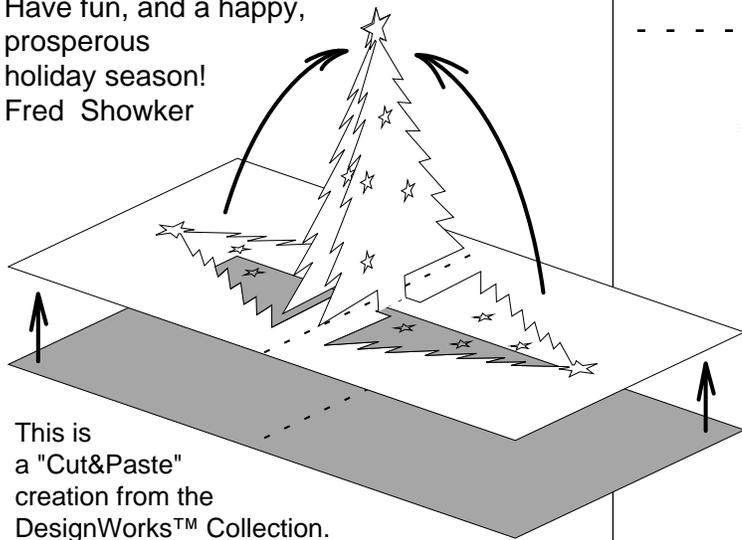

Score along the dotted lines with a thin
blunt object, like an empty ball-point pen
works great!

Carefully cut out along the heavy outside
lines of the tree, by connecting the dots
(holes) from the straight pin. For best results,
use a sharp, new #11 X-Acto blade.

Fold the tree sections up, along the score
lines, and glue just the star at the top. Use
glue sparingly.

Now glue the card onto a second card
which will form the outside "shell." Use glue
sparingly so you won't wrinkle the card. A
glue-stick works well for this. Try a colored
paper for the shell! Paste down the stars (You
did save the stars didn't you!) in position in
the opening left by the cut-out.

What a nice card to send someone!
Have fun, and a happy,
prosperous
holiday season!
Fred Showker
